provided critical genetic screenings, and offered personalized genetic counselling to attendees. By identifying carriers and individuals affected by thalassemia, the camp enabled early detection, which is key to preventing complications and managing the disorder effectively. The involvement of physiotherapy students added value to the event, providing them with practical experience and a deeper understanding of community healthcare.

The Neotech Institute of Physiotherapy for providing the platform to organize and execute the event.

All participants for their active involvement and enthusiasm in attending the screening and educational sessions.

The medical professionals – including genetic counselors, lab technicians, and healthcare experts – whose contributions ensured the success of the screening process and provided essential support to attendees.

The physiotherapy students who demonstrated professionalism, compassion, and dedication in assisting with the event, offering both hands-on help and educational guidance.

The local community for its strong engagement and participation in this health initiative, highlighting the importance of preventive healthcare.

The organizing committee and volunteers for their tireless efforts in coordinating the event and ensuring its smooth operation.

All sponsors and partners who supported the event, helping to provide free screenings and educational resources to the community.
