NC/NIP /Event report/2024-25/016

Date: 12/05/2025

9. Outcomes of the Event:

Participants will gain accurate, evidence-based information about HPV, its modes of transmission, and associated health risks (e.g., cervical cancer).

increased likelihood that participants will adopt preventive measures such as getting vaccinated, practicing safe sex, and scheduling regular screenings

More participants may follow up with healthcare providers for HPV vaccination, Pap smears, or HPV testing after the session.

10. Feedback Summary:

The session received positive feedback from participants, with many expressing appreciations for the clarity, relevance, and importance of the topic. Most attendees reported feeling more informed and confident about HPV and preventive health actions after the session.

The session was highly effective in achieving its goal of raising awareness and promoting prevention of HPV among female staff. Based on participant feedback, future sessions could be enhanced with additional multimedia resources and follow-up health consultations.

11. Conclusion & Acknowledgment:

We extend our sincere gratitude to all those who contributed to the successful organization and execution of the awareness session:

Guest Speaker- Thank you for delivering an informative and engaging session that empowered our staff with valuable knowledge about HPV and preventive health care.

Participants: - We appreciate the enthusiastic participation and openness of our female staff, whose curiosity and engagement greatly enriched the discussion

Support Staff: - Thank you for managing logistics and ensuring a comfortable and welcoming environment for all attendees.

This session marked an important step in promoting women's health and well-being within the workplace. We look forward to organizing similar educational initiatives in the future to continue empowering our staff through knowledge and preventive care.
