Report on
Project Awareness Expert Lecture

The Project Awareness Seminar/Expert Lecture was organized by Computer department which was conducted by **Mr. Meet Patel** [Newyork Instruments Pvt]. The main aim of organizing this seminar was to bring awareness among the students about the selection of the **Project Definition, Team Management, Implementation Advice**, awareness about the current technology and much more.

Mr. Meet Patel started with his introduction and was very friendly in explaining the most vital phase of our engineering, our final year project and explained us with ease. He explained us how to balance our routines with the most important phase of final year; the project. Team management and work bifurcation was explained in detail. **Present Technology/s Scope was Explained**. We were made aware that we may have to work under pressure in the coming year and also managing our current semester subjects. Career Guidance was also given.

So hereby we came to a conclusion where we could decide our project definition easily and select our team members smartly. We were very much satisfied with his knowledgeable information by which we concluded that bringing out a unique definition is not what is expected, but we need to develop our skills more profoundly. The project should also be having **Future Scope** as well as it should be feasible and can be implemented by the team member's **Knowledge and Skills**. Thus, as a whole it was a very interactive and informative session.
