EngiExpo 2024

Exploring Cutting-Edge Technologies and Pharmaceutical Engineering

Date: 19th February 2024

On February 19, 2024, our college faculty and students actively participated in EngiExpo 2024 at Ansuya Leprosy ground, Ajwa road, Vadodara. This event provided a valuable platform to explore the latest engineering innovations. Our faculty engaged in insightful presentations, gaining a deeper understanding of emerging technologies, while students benefited from interactive exhibits, gaining practical knowledge. Notably, the section on pharmaceutical engineering, particularly the showcased distillation assembly, stood out. It highlighted the critical role of such equipment in ensuring pharmaceutical product purity. Our attendance at EngiExpo 2024 not only enhanced our understanding of current industry practices but also fostered connections for potential collaborations in the field of pharmaceutical engineering.
